

*...adding tomorrows every day.*

Cystic fibrosis (CF) is a genetic disease affecting approximately 30,000 people in the United States. According to the CF Foundation's National Patient Registry, the average survival rate is only the mid-30s. As more advances have been made in the treatment of CF, that age has grown steadily.

**Please help Dallastown Area High School's Volunteer Club by raising money for the CF Walk, on May 24<sup>th</sup>, 2007.**

All money collected from this walk will go towards the CF foundation. The mission of the Cystic Fibrosis Foundation--a donor-supported, nonprofit organization--is to assure the development of the means to cure and control cystic fibrosis and to improve the quality of life for those with the disease.
